## Aanleiding

Uit het akoestisch onderzoek voor de A13/A16 is gebleken dat een overschrijding van de toetswaarde voor de geluidbelasting als gevolg van de rijksweg niet overal met doelmatige maatregelen (bron- en overdrachtsmaatregelen) kan worden voorkomen. Conform de *Wet milieubeheer (Wm)* en het *Besluit geluid milieubeheer (Bgm)* is derhalve bekeken of sprake is van mogelijke samenloop met andere geluidsbronnen. Geluidgevoelige bestemmingen komen in aanmerking voor een beoordeling van cumulatieve effecten als deze binnen de invloedssfeer van één of meerdere van deze bronnen liggen en indien de voorkeursgrenswaarde door die bron(nen) wordt overschreden.

Van de geluidgevoelige bestemmingen waarvoor sprake is van een overschrijding van de toetswaarde, is het cumulatief geluidniveau bepaald evenals de bijdrage van elke bron apart. Conform artikel 35 lid j Bgm treedt RWS in overleg met bronbeheerders van andere relevante geluidbronnen teneinde te bespreken hoe samenloop is te voorkomen dan wel zoveel mogelijk is te beperken.

## Doel

De doelstelling van het overleg is:

1. in overleg treden met bronbeheerders van andere relevante geluidbronnen teneinde te voldoen aan het in artikel 35 lid j Bgm gestelde;
  - a) teneinde te vernemen hoe de relevante bronbeheerders aankijken tegen (extra) maatregelen aan de desbetreffende bron;
  - b) of (autonome) ontwikkelingen zijn te onderscheiden waardoor de geluidbelasting afkomstig van de bron toe- of afneemt;
  - c) dan wel of communicatietrajecten worden gestart ten aanzien van of waarbij geluidbelasting een rol speelt.
2. bespreken welk geluidniveau (wel/niet cumulatief) in de vervolgstap,

zijnde gevelisolatie, moet worden aangehouden. Hierbij wordt de bronbeheerders opgemerkt dat de toezegging aan de regio van voormalig minister van Verkeer & Waterstaat Camiel Eurlings dat ruimhartig met cumulatie zal worden omgegaan van belang. Eventueel kan worden bekeken of met meerdere bronbeheerders kan worden ingezet op gevelisolatie, hoe en met welke middelen zal t.z.t. nader moeten worden verkend.

### **Cumulatieve effecten**

Uit het akoestisch onderzoek blijkt dat voor circa 1500 woningen in de omgeving van de A13/A16 de toetswaarde van max. 50 dB (voor aanleg van een nieuwe weg) wordt overschreden. Voor deze woningen is gekeken naar eventuele cumulatie met andere geluidsbronnen. Overigens wil een overschrijding niet zeggen dat geluidbelasting toeneemt ten opzichte van de situatie bij volledig benutte geluidplafonds.

#### *Overige geluidsbronnen*

In het studiegebied zijn, naast de A13/A16, Rotterdam-The Hague Airport (RTHA), de HSL, het onderliggend wegennet (ONW), het hoofdwegennet (HWN), de spoorlijn aan de zuidkant van het Terbregseplein en de RandstadRail als geluidbronnen te onderscheiden. Per toetspunt (woning) is berekend wat de geluidbelasting van elke (afzonderlijke) bron is. Vervolgens is per toetspunt aangegeven wat de cumulatieve effecten zijn, en indien sprake is van overschrijding, welke geluidbron daarin meest maatgevend is. Voor een overzicht van deze (gecumuleerde) geluidsbelastingen, het aandeel van de verschillende bronnen in deze gecumuleerde geluidsbelastingen, als ook de toe- en afnames, wordt verwezen naar het akoestisch onderzoek.

Daarbij wordt het navolgende opgemerkt:

- Het merendeel van de geluidsoverschrijdingen concentreert zich rondom Terbregseplein en rondom de kruising met de HSL/RandstadRail en het vliegveld RTHA.
  - Ten noorden van het Terbregseplein zijn met name de hoofdwegen (A16 en A20) en het onderliggend wegennet de maatgevende bronnen.
  - Direct ten zuiden van het knooppunt het spoorweglawaaï van de spoorlijn Rotterdam – Gouda.
  - Meer naar het oosten richting de A13 vormen het vliegverkeer en het spoor in toenemende mate de maatgevende bronnen.
- Wanneer als gevolg van de vaststelling of wijziging van GPP's geluidsbelastingen op gevoelige objecten worden toegestaan die boven de toetswaarde liggen, moet in de daaropvolgende fase (voor realisatie) door RWS worden onderzocht of de wettelijke binnenwaarden niet worden overschreden. Gevelisolatie is dan een mogelijke maatregel. Deze maatregel zal na vaststelling van het Tracébesluit (medio 2016) verder worden verkend. Op dit moment kan niet met zekerheid worden gesteld dat voor alle woningen ook daadwerkelijk gevelmaatregelen noodzakelijk zullen zijn. Mogelijk heeft een aantal woningen al voldoende geluidwering en zijn geen aanvullende maatregelen nodig.

### **Conclusie en aandachtspunten**

Wettelijk gezien hoeven de gezamenlijke bronbeheerders geen verdere bron- of schermmaatregelen te nemen dan nu is voorzien in het maatregelenpakket. De bronbeheerders zijn ook van mening dat er vooralsnog geen andere doelmatige maatregelen zijn te treffen, anders dan reeds voorzien in het kader van het OTB. Wel onderkennen de bronbeheerders enkele ontwikkelingen die van invloed kunnen zijn op de cumulatieberekeningen:

- In het kader van saldo-0 (onderzoek regiopartijen) kunnen keuzes worden gemaakt t.a.v. bron- en schermmaatregelen (bijv. het wegdektype) die van invloed kunnen zijn op het akoestisch onderzoek/de huidige berekeningen van de cumulatieve effecten. Tussen het OTB en TB zouden derhalve, onder meer n.a.v. saldo-0, wijzigingen in het maatregelenpakket kunnen optreden.
- Ten behoeve van het vliegveld RTHA loopt op dit moment verschillende onderzoeken (MER) in het kader van een bestemmingsplanwijziging en luchthavenbesluit. Eind dit jaar worden de eerste resultaten verwacht. Voor het OTB is dit niet van invloed; voor het TB mogelijk wel.

### **Acties en (vervolg)afspraken**

Naar aanleiding van het besprokene is een aantal vervolg acties gedefinieerd:

1. Om gezamenlijk inhoud te kunnen geven aan het in art. 35 lid j Bgm gestelde en te bepalen hoe cumulatieve effecten kunnen worden voorkomen dan wel worden beperkt, is aanvullende informatie benodigd die op het moment van bijeenkomen nog niet beschikbaar is. Eventuele conclusies zouden derhalve voorbarig zijn. Het betreft hier, zoals hierboven besproken, de volgende informatie:
  - a. De uitkomsten van het saldo-0 onderzoek;
  - b. De uitkomsten van het onderzoek van RTHA in het kader van MER en vergunningverlening.
